Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

Claims 17-33 and 48-55 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 03/28/2008.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-16 and 34-47 are rejected under 35 U.S.C. 103(a) as being unpatentable over **Powers et al. (US 5810789)**.

The cited patent shows in figures 1, 5, and 6 two embodiments that, in the opinion of the examiner are combinable to reject applicant's invention. Figure 1 above shows a boot (20) having a tapered outer wall having a diameter that decreases toward the distal end; the outer wall is enclosing a longitudinally extending lumen. Figure 1 does not show a bifurcation assembly having one extension leg. However, figures 5 and 6 above, demonstrate the conventional of a bifurcation assembly design having at least one extension leg extending from an end of the apparatus and one stem extending from the other end, wherein the stem is configured to be received into a lumen of catheter (46).

Based on the above observations, for a person of ordinary skill in the art, modifying the boot disclosed in figure 1, with a bifurcation assembly design, as shown in figure 2, item 56, having at least one extension leg extending from an end of the apparatus and one stem extending from the other end, would have been considered obvious in view of the proven conventionality of this particular bifurcation design.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Manuel A. Mendez whose telephone number is 571-272-4962. The examiner can normally be reached on 0730-1800 hrs.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mr. Nicholas D. Lucchesi can be reached on 571-272-4977. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
